

14 December 2022

Product Change Notification:
ER2188 Part B Curing Agent Change Notification
14th Dec Update

This amend is to update the previously issued product change notification of 23rd September 2022. The changed formulation has now passed UL testing and is officially UL94 V-0 recognized. If you have questions regarding these changes, please contact us.

Description of Change:

A curing agent component in the part B of ER2188 has been replaced due to raw material obsolescence.

Impact and Recommended Action:

Our internal testing demonstrates comparable performance of the new part B when used at the same volumetric mix ratio as the previous formulation, including mixed viscosity, useable life and gel time, hardness, flame retardance and tensile strength. The new formulation has UL94 V-0 approval.

While our testing indicates equivalent performance, we always recommend for customers to satisfy themselves as to performance in their application and end-use conditions before implementing.

Product Codes Affected:

Product Order Code	Size
EER2188RP50G	50g resin pack
EER2188RP100G	100g resin pack
EER2188RP250G	250g resin pack
EER2188RP500G	500g resin pack
EER2188RP1000G	1000g resin pack
EER2188K5K	5kg resin kit
EER2188K10K	10kg resin kit
EER2188K25K	25kg resin kit
EER2188BB5K	5kg bulk part B

Yours faithfully
