

## SWMP

### Safewash Mechanical Cleaner Plus

SWMP is a non-flammable, water-based product that can be sprayed, dipped, brushed or used in batch cleaning systems. It is designed as a more active version of SWMN and will remove stubborn dirt and grease deposits facilitating more efficient machinery performance. These products have been specifically developed as replacements for the toxic and highly hazardous solvents present in other degreasers on the market. They exhibit excellent results without compromising on cleaning performance.

- Excellent degreasing properties; designed for removing stubborn residues from mechanical parts
- Ready to use, no dilution required; minimises production processes
- Effective at ambient temperatures; supports energy efficient applications
- Non-flammable product, 100% ozone friendly; can be used in equipment or manually applied

<b>Approvals</b>	<b>RoHS-2 Compliant (2011/65/EU):</b>	<b>Yes</b>
<b>Typical Properties</b>	Appearance	Blue Liquid
	Boiling Point (°C)	98
	Flash Point (°C)	None
	Freezing Point (°C)	-5
	Density @ 20°C (g/ml)	1.009
	pH	11.65

<u>Description</u>	<u>Packaging</u>	<u>Order Code</u>	<u>Shelf Life</u>
<u>Safewash Mechanical Plus</u>	25 Litre	SWMP25L	24 Months
	200 Litre	SWMP200L	24 Months

### Directions for Use

Ready to use, no dilution required. As a cleaner for degreasing applications, product use varies depending on the day-to-day needs involved. Ideal for cleaning general dirt from metals that are not sensitive to alkalis. SWMP is safe to use on most plastics and rubbers (test before bulk use). SWMP will not normally attack sensitive metals unless they are cleaned many times or unless the units are immersed for an excessive cleaning period.

Parts can be soaked in a bath and agitated with a brush if required until clean before being rinsed in tap or deionised water. The parts can then be left to dry or wiped dry depending on time available. Parts could also be sprayed on and rinsed off, mechanically or by hand, using a spray hose system.
